DETAILED ACTION

Response to Arguments

(1) Applicant argues that Golubchik fails to teach the limitation that the composite of the first transmission and data of the target transmission is not time-distorted. Moreover Applicants argue that Golubchik teaches against this limitation, as Golubchik's method of merging two streams involves adding additional frames to a stream or removing frames from a stream.

The Examiner respectfully disagrees with Applicant's assertion. Although the Examiner does concur that the adding and deletion of frames would effect the time, Applicant's have not defined how the transmissions are 'not time-distorted'. In other words, the claims fail to recite the meaning of time-distortion. As a result, the Examiner maintains the rejection and respectfully submits that applicant's arguments are not persuasive.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2611

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by by the article on Reducing I/O demand in Video-On-Demand Storage Servers (cite by Applicant) hereinafter “article”.

Regarding claim 1, the Article discloses a system and method of VOD piggybacking. The Article teaches merging two VOD streams, the “target transmission” stream is the initial stream transmitted. The claimed “scheduling a first transmission of a program in response to a client request by a client, wherein the program has a playback rate” is met by the service a second request by a client for the same video (see page 28 paragraphs 2 and 3 on the left). Since there is no change or alteration in the initial or target transmission, the Article discloses the claimed “absent a change in the target transmission”. The Article further discloses receiving a composite of the target transmission and the first transmission (see page 28 paragraphs 2 and 3 and page 29 fig. 4 and the paragraph following, noting the composite as streams I and J). It should be noted that each stream is transmitted in real time, i.e., at the time of request and is not “time distorted”. The Article still further discloses merging the two streams is possible by altering the display and transmission rates by adding or removing from (see page 27 the 4th and 5th paragraphs on the left). The target stream will have a transmission rate (playback rate) of 30 frames/sec and the first stream will have a display rate of $30 \times 11/10$ (adding a frame for every 10). It should be noted that the

composite data rate, for both streams is "non-integer multiple" of the playback rate $[(30 + 30 \times 11/10)$ or the composite is a non-integer multiple of the playback rate 30)].

Allowable Subject Matter

Claims 2-8 and 17 are allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
